

Allan Fernandes

Zealous front-end developer with three years of experience.
Focused on building accessible products while also genuinely caring about user experience.

Relevant Experience

Web Developer · **NTSU** September 2022 - Present

- Developed and deployed websites for multiple projects within the student union, effectively aligning design and functionality requirements to meet the diverse needs of the organization and its members.
- Maintained and updated NTSU's website, handling requests from various departments and ensuring accurate and timely delivery of updates to enhance user experience.
- Improved website performance by optimizing page load speed and reducing page requests, resulting in a higher lighthouse score and enhanced user experience.
- Managed email communications for a student body of approximately 11,000 students, executing responsive and visually appealing email campaigns for effective communication.

Front-end Developer · **This is DMG** May 2021 - Feb 2022

- Designed and developed interactive web applications for DMG, a German startup, ensuring compliance with strict GDPR regulations and prioritizing website accessibility to cater to a European client base.
- Collaborated remotely with cross-functional product team members to implement effective business solutions, fostering seamless communication and alignment to achieve project goals and deliver high-quality outcomes.
- Demonstrated a commitment to quality and attention to detail, ensuring that all web applications met the highest standards.

Web Developer · **The Starter Labs** Sep 2020 - May 2021

- Spearheaded the establishment of an in-house web department at Starter Labs, taking charge of setting up project pipelines and ensuring seamless execution.
- Successfully delivered 13 projects on time, prioritizing client satisfaction and maintaining a track record of successful project completion.
- Streamlined workflows and processes within the web department, implementing efficient project management strategies that enhanced productivity and collaboration, resulting in improved project delivery timelines and client engagement.

Web Developer · **Unifynd Technologies** March 2019 - August 2020

Web Intern · **Unifynd Technologies** Nov 2018 - February 2019

- Built visual interfaces for one of India's leading retail merchants' (Phoenix Market City) reward program, involving admin dashboards, and web components.
- Played a key role in revamping the company's website, contributing to the redesign and implementation of new features to increase user engagement and effectively showcase services and offerings.
- Demonstrated exceptional performance as an intern, earning a full-time role at Unifynd Technologies, leveraging design expertise to create seamless user experiences and contribute to the successful execution of projects at Unifynd Technologies.
